

SR .NET DEVELOPER/ WEB DEVELOPER

DESCRIPTION:

The ideal candidate would possess a thorough understanding of the .Net Framework and related technologies. Trillium develops Windows clients, ASP.net web pages, remoting components and web services, using Microsoft C# within our custom application framework. The primary database software is Microsoft SQL. We offer a stimulating environment for senior software developers who can analyze, develop, deliver and support high quality business software. The ideal candidate will have strong abilities to design and develop complete systems that integrate with the existing software library. Software testing, database design, project management, documentation and user training are all routine expectations of the development team.

REQUIREMENTS:

- Net Framework 2.0
- Excellent skills in ASP.NET/ C# / VB.NET programming
- Experience with database development and design using Microsoft SQL 2000 or greater
- Team spirit and client communication skills
- Willingness to learn emerging technologies, train and lead others to obtain technical & management certification(s) to enhance company partner positions
- Desire to continuously improve both yourself, your team and the work environment
- A drive to be the best, to win and to succeed at all costs!

ADDITIONAL SKILLS WOULD BE A PLUS:

- Web Services
- Microsoft SharePoint
- Visual Source Safe 2005
- SOA Experience
- .Net 3.0 (WCF, WF, WPF)
- Agile methodology experience
- MCSD or additional Microsoft Certifications

Relevant Work Experience: 3-5 years direct work experience

Education: Bachelor's Degree
