

## Full Stack Lead Developer - Software Engineer

Do you excel in a Lean Agile environment with Extreme Programming practices?

This position will challenge your extensive experience, combining design with mobile and back-end development. You will be translating UI / UX design wireframes into frameworks providing APIs, and the visual elements of applications. The small; collaborative; agile; cross-functional teams engage in an open plan dynamic work environment.

Required:

- Strong Communications skills – oral and written, with the ability to illustrate and convey ideas and designs effectively with team and partners.
- 7+ years of Java web development.
- 5+ years of RESTful web service (API's) development.
- 5+ years of extensive front end development, including:
  - JavaScript, HTML5, CSS3, Bootstrap, Angular JS, React JS, jQuery.
- 5+ years of Spring Framework development, including:
  - Spring Boot, Spring Framework, Spring MVC, Spring Data, Spring Security.
- 2+ years of cloud platform development and deployment, e.g.:
  - AWS, Azure, Cloud Foundry, and et cetera.
- Perform Unit and Integration Testing on all code as it is developed.
- Custom User Interface – Visual Transitions Core Animation.
- Conduct all development work in native programming languages, such as:
  - Objective-C / Swift for iOS, Java for Android, Ruby / Python / Node.JS on the back-end.
- 2+ years of mobile application development, including:
  - iOS, iPhone
- 3+ years of experience securing RESTful API's using Industry standard protocols.
- 3+ years of Agile and iterative development.
- 2+ years of Test Driven Development and CI / CD deployment.
- 2+ years of paired programming experience.
- REST API integration.
- 3<sup>rd</sup> Party library integration.

Advantageous:

- Hands-on experience with Pivotal Software's product portfolio.
- Experience API managers and micro-services design.
