

Infrastructure/Data Migration Project Management Lead

To perform this job successfully for Trillium Teamologies Inc. (TTI), the Infrastructure/Data Migration Project Management Lead must have proven infrastructure experience with large scale data center migrations and perform the following:

- Lead the planning and implementation of large IT Data Center migrations.
- Prior experience managing Physical Data Center migrations from old to new.
- Must be a technical leader that can drive project processes and technical projects to meet time sensitive deadlines.
- Work with stakeholders to gather, document and manage the business requirements for data migrations from on premise datacenters to cloud environments.
- Develop, manage and communicate detailed project plans, communication cadence and drive the team to meet tight deadlines.
- Analyze unexpected issues and develop viable solutions
- Directs the work of internal and external resources including vendors and 3rd party entities.
- Ensures projects are completed on-time, to scope and within budget.
- Build credibility, establish rapport and maintain communication with stakeholders at multiple levels, including those external to the organization.
- Implement processes consistent with Project Management Professional (PMP) using AGILE best practices and SCRUM methodologies.
- Facilitate the definition of program scope, goals, and deliverables.
- Capture overall program resource requirements based on the accepted Project plan and manage resource allocation.
- Proactively identify potential issues/risks and propose mitigation plans and/or alternative solutions.
- Identify, define and manage key performance indicators, implement meaningful metrics, and measure project performance
- Prepare and lead presentations for management, stakeholders and customers to articulate program status, key risks, and mitigations, and technical milestones.

Skills and experience:

- Minimum 5 years of experience as a PM Lead on IT Data Center migrations.
- Experience in delivering large and complex software / Infrastructure programs.
- Demonstrated program leadership skills.
- Expertise with project management applications/tools.
- Hardware / Software Life Cycle management and migrations.
- Hypervisor experience

- Complete knowledge and understanding of Data Center Infrastructure; monitoring and management, security and access controls, power distribution, cable management, switches, fiber, firewalls, ISPs, redundancy, UPS, generators, cooling, servers, racks, etc.
- Third party and Vendor coordination and management.
- Excellent detailed organizational, technical leadership and interpersonal skills.
- Minimum 8 years' experience with project management methodologies and tools including MS Project, Agile, SCRUM.
- Proven experience in strategic planning.
- Cloud experience is a plus.
- Pivotal experience is a big plus.
- Scripting and other technical skills are necessary long-term pluses.

Personal attributes and values:

- Superior written and oral communication skills – ability to communicate technical concepts and support assertions with data.
- Critical Analytical/Problem solving ability.
- Entrepreneurial think tank leadership style.
- Self-starter with team development and motivation abilities
- Highly tenacious and detail oriented.
- Gregarious personality with astute comprehension of team, division and corporate dynamics and politics.
